The list starts with the oldest major release. AutoCAD 2000 (v.12) introduced multi-viewport modeling, which allowed simultaneous viewing from multiple viewpoints. AutoCAD 2001 added a projection system, allowing geometric projections to be defined from a single coordinate system. It also introduced indirect reference objects and extended the custom shape options to allow for polyline-based shape building. AutoCAD 2002 offered the use of parametric surfaces and geodesic grids in CAD, introducing parametric surfaces, which allowed surfaces to be shared and to modify many properties at the same time. Additionally, it offered the use of component textures, which allowed for composites and cloned objects to be automatically blended based on component level attributes. AutoCAD 2003 introduced the Change Geometry command, which allows one to generate a representation of the current drawing from selected entities, and the ability to edit existing components. AutoCAD 2004 introduced the concept of the Table Manager, which allows the user to quickly modify multiple properties at the same time by using the edit table function. This release included a comprehensive set of shape commands, including the ability to transform and manipulate shapes. AutoCAD 2005 introduced the concept of intelligent prompts, where prompts are displayed based on the user's proximity to specific objects, and when modifications are made, the drawing is automatically updated. AutoCAD 2006 introduced the Layer Manager. The Layer Manager was designed to allow for the efficient creation and management of layers, including the ability to use external files for layer definitions and the ability to group layers together and create collections. It also introduced the concept of the Type Manager, which allows for the management of types, and allows for the creation of custom types. Additionally, it introduced the ability to set boundary limits for editing, and the inclusion of a set of alignment commands that can be used to align objects or layers. Auto a1d647c40b
